DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-11, drawn to a method of matching, classified in class 705, subclass 27.
- II. Claims 12-21, drawn to a rules based logic, classified in class 700, subclass 29.
- III. Claims 22-28, drawn to an input device query, classified in class 710, subclass 65.
- IV. Claims 29-33, drawn to rule based logic driven by input data, classified in class 708, subclass 161.
- V. Claim 34, drawn to a memory medium, classified in class 369, subclass 272.

The inventions are distinct, each from the other because:

Inventions I-V above are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, inventions I-V respectively each has separate utility such as an either a system or method allowing home improvements to be seen beforehand as virtual images. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to PRIMARY EXAMINER Joseph A. Fischetti whose telephone number is (703) 305-0731.
